

The Nordic Battery Scene

– a webinar

Placeholder: June 30th 9am-11.15am

On June 30th, you are cordially invited to attend a webinar looking into the status of the battery ecosystem in Norway and Sweden.

Some of the themes that will be touched upon during the webinar are:

- **Actions to contribute to the ambitions and goals in EU's New Green Deal**
- **How cooperation between businesses in Norway and Sweden can add value into the battery value chain, to develop, produce and recycle the world's most sustainable batteries**

“The transport sector represents 25% of Europe's CO₂ emissions and sustainable mobility is one of the key focuses of the developing European New Green deal. The transition from today's fossil fuel-based transport sector to electric mobility is a significant sustainable value creation opportunity for both Norway and Sweden. Swedish and Norwegian cooperation with support from our Nordic neighbours can deliver a full European value chain and the world's greenest lithium ion batteries (LIB). “

The following guests are confirmed on the agenda:

- **Maroš Šefčovič – VP EU Commission**
- **Arvid Moss, president of NHO The Confederation of Norwegian Enterprise in conversation with SN Confederation of Swedish Enterprise**
- **Emma Nehrenheim from Northvolt AB**
- **Moderated Q&A with Executive representatives from Sweden and Norway and/or political level as closing remarks**
- **Further VIPs to be confirmed**

The event will be moderated by Nora Rosenberg Grobæk; Head of Battery with Invest in Norway (part of Innovation Norway) and Thea Schøyen Special advisor Energy with Innovation Norway in Sweden)

Save the date: June 30th 9am-11.15am

This is a save-the-date only, and a link for signing up will be sent soon. The Webinar will be streamed and you will receive a link in due time.
