

- Tratec Agdermaskin is a technology and service company with-in conveying, robotization and bulk handling. Tratec Agdermaskin was founded in 1948 located at Nodeland outside Kristiansand in the southern part of Norway. We currently employ more than 75 highly skilled personnel including inhouse engineering, service and installation supervisors.
- Tratec Agdermaskin together with our sister companies Tratec Norcon and Tratec Electro supplies integrated systems and products for bulk handling within the process industry and combustion industry. As we have qualified engineers inhouse with long experience and used to work close with our customers, we can offer standard or tailormade solutions optimizing customers requirements.
- The systems includes concept studies, project management, engineering/planning, PLC programming, electrical, Installation and commissioning.
