

Create powerful machine learning models  
in minutes,  
without a single line of code!

Intelecy is a no-code AI platform built for industrial data and made for industrial citizens.

The only industrial AI software designed for the knowledge worker, engineers, and operators to create sophisticated AI algorithms, without any prior knowledge of coding and data science.

### Sustainable eco-systems

- Reduce waste
- Reduce emissions
- Reduce energy consumption

### Optimize production

- Efficiency optimization
- Increase throughput
- Forecast quality

### Asset health

- Early warnings
- Changed behavior
- Predictive maintenance

Get real-time AI predictions and forecast the future of your processes by building your own no-code machine learning model and stream your AI prediction back to your current controllers seamlessly and without compromising security.

Take your digitalization to the next level of actual value creation with no-code AI. Sign up for a free trial at [www.intelecy.com](http://www.intelecy.com)
